Day ride

This short ride started at 8:00 am with temp around 45 degrees just to run errands.

With a 45 minute trip across HWY 82E to Greenwood the first stop lasted only a few minutes, but as things go others were postponed until later in the day.

A check with the GPS and I found a few roads to occupy my time, so off I go.

After a leisure ride through town it was north to Money MS continuing to Hwy 8, turning East to Holcomb and then North on Hwy 7 to Grenada and on to Grenada Lake .

After a gourmet lunch and watching the fishermen not catch anything it was back on the road around the lake .

After a nice ride through the backwoods noticing how low the water level was time kinda got away from me but thanks to a reminder in my phone and an alarm a few minutes later It was back down hwy 7 to Greenwood. Making my appointment just in time.

The temp reached 70 degrees as I traveled back across the delta planning my next ride .

Although it was only a day ride it was truly great to be out on two wheels .

Hope to see you on the road

Bobby
